EDUCATION

PSG College of Technology
BACHELOR OF APPLIED SCIENCE

Coimbatore | 2017 - 2020

WORK EXPERIENCE

KESSFLOW | SENIOR SOFTWARE ENGINEER

Chennai | December 2023 – PRESENT

- **Frontend engineer** specializing in high-performance rendering, real-time state sync, and CI/CD automation within a large-scale React micro-frontend monorepo.
- Built a virtualized rendering engine in React (windowed rendering + imperative scroll control) sustaining 100,000+ rows at 15–20 DOM nodes with near-constant memory.
- Managed application state with **Zustand** and built scoped, maintainable component styling using Module CSS across features.
- Contributed to a 20+ service micro-frontend architecture (**Rspack + Module Federation**), enforcing module boundaries and driving the Javascript to TypeScript migration with Zod validation.
- Automated security auditing to detect vulnerabilities in external dependencies through Jenkins and GitHub Actions pipelines, catching vulnerable packages before merge.
- Contributed to an in-house design system built on headless components (Radix), delivering accessible, reusable UI primitives across services.

PUBLICIS GROUPE | FRONT END DEVELOPER

Bangalore | August 2023 – December 2023

- Worked in an E-commerce project using technologies such as **ReactJs**, Redux toolkit, HTML5, CSS3, and Bootstrap 5.
- Built cross-browser compatible and accessibility compliant websites, resulting in 22% faster load time than industry average.
- Built reusable React Components and integrated APIs onto it.

COGNIZANT TECHNOLOGY SOLUTIONS | FRONT END DEVELOPER

Chennai | March 2021 – July 2023

- Developed responsive, modern web applications based on stakeholder requirements and industry standards for over 40 customers.
- Produced multiple visual elements of web applications by translating **UI/UX** design wire frames into code, producing high quality markup using HTML5 and CSS3.
- Interacted with UI/UX designers to improve existing applications and increase conversion rates by 20%.
- Developed and Implemented front-end architecture to support User Interface concepts with 100% accuracy performance optimization and features development.

PROJECTS

FORKIFY APP

HTML, SCSS, JAVASCRIPT, PARCEL.JS

- A modern recipe web application hosting over 1,000,000 dishes; features semantic JavaScript structure to calculate required ingredient amounts dynamically relative to user-selected serving sizes.

FOOD DELIVERY APP

REACT.JS, FIREBASE, TAILWIND CSS, REACT ROUTER

- An interactive e-commerce platform built with ReactJS and Tailwind CSS that utilizes browser Local Storage for robust cart state persistence and handles live menu data arrays via custom Firebase context configurations.

SKILLS

Web Technologies: HTML5, CSS3, JavaScript, TypeScript

Libraries/Frameworks: ReactJs, Zustand, Redux toolkit, Rspack, Module Federation, NextJs Basics, Python, MongoDB

Tools / Platforms: Git, GitHub, Bitbucket, Visual studio code, Firebase RTDB, Jenkins, GitHub Actions, Bun
